PROJECTS

IntelliQ (Stack Overflow-Inspired Q&A Platform) | GitHub [🔗](#)

- Developed a full-stack Question & Answer platform using Next.js 16, TypeScript, Appwrite, and Tailwind CSS, enabling users to ask questions, answer discussions, vote on content, and manage developer profiles.
- Integrated Appwrite Authentication, Database, and Storage to implement secure login, rich text editor with image uploads, reputation tracking, search, pagination, and real-time data management.
- Designed a modern, responsive interface with Framer Motion, Magic UI, and Zustand, utilizing Next.js App Router and React Server Components for scalable architecture and optimized performance.

Sentiment Analysis using BERT | GitHub [🔗](#)

- Developed a NLP system using fine-tuned BERT for sentiment classification of positive, negative, and neutral text.
- Developed and integrated a FastAPI backend with a React frontend
- Implemented data preprocessing, tokenization, model evaluation, and deployment workflow using Hugging Face Transformers and Python.

Demo: <https://bert-model.vercel.app> [🔗](#)

AI Voice Interview Coach | GitHub [🔗](#)

- Built an AI-powered interview practice application using Streamlit and Whisper for speech transcription and feedback analysis.
- Implemented speech metrics analysis including WPM, filler words, and NLP-based tone/sentiment evaluation.
- Designed a real-time feedback system with optional voice output to simulate interview interactions.

EDUCATION

BACHELOR IN TECHNOLOGY, MIT ADT UNIVERSITY

School of Computing

CGPA: 8.69

2023 – 2027

pune

TECHNICAL SKILLS

Programming Languages

C++, Python, Java, JavaScript

Data Structures & Algorithms

- Arrays, Linked Lists, Stacks, Queues, Trees, Graphs
- Time & Space Complexity Analysis
- Problem Solving

Web Development

Next.js, React.js, Node.js, Express.js, Appwrite, Tailwind CSS, HTML5, CSS3, REST APIs, Zustand

AI / ML

Scikit-learn, Pandas, NumPy, Pytorch, NLP, Hugging Face Transformers, Flask

Databases

- MongoDB
- MySQL
- Oracle SQL

Tools

Git, GitHub, Vercel, VS Code, Postman

Experiences

AICTE, Shell India & Edunet Foundation

06/2025 – 07/2025

AI & Data Analytics Intern Developed and evaluated ML models for water quality classification, performed data preprocessing and visualization, and applied predictive analytics to real-world datasets using Python.

GeeksForGeeks student chapter MIT-ADT

08/2025 – Present

Tech Team Member Supporting technical event organization including coding contests, hackathons, and workshops.

pune

Certificates

Design and Analysis of Algorithms, IIT Madras (NPTEL)

- Covered algorithm design techniques, time complexity analysis, dynamic programming, greedy methods, and graph algorithms.

AWS Academy Cloud Foundations, Amazon Web Services

- Covered cloud computing concepts, AWS core services, security, architecture, pricing, and support.

Data Modeling in Power BI, Microsoft (via Coursera)

- Learned data modeling in Power BI, including relationships, DAX, Power Query, and dashboard development for business intelligence and data analysis.
